

Polygonale C.T.S.

Polygonale C.T.S. - a new approach to event-structure-design

In its concern to create and provide new types of structures to our customers, Walter has developed a Polygonale structure conforming to C.T.S. standards for mobile and temporary use.

Apart from its decidedly different look appreciated by users, one of the main advantage of this structure compared to a traditional A-frame structure is that it enables substantial interior heights, which is much appreciated in the show and exhibition world.

The Polygonale C.T.S. range is geared primarily to those renting structures, and it aims to add to and modernise the spectrum of temporary structures in the events market.

It offers new applications and new openings, particularly for festive gatherings such as theatrical performances, theatre covers etc. or indeed exhibition halls, enhancing every sizeable event or product presentations, etc.

Width	Eave height	Interior ridge height
15 m	3 m	6,38 m
15 m	4 m	7,38 m
20 m	3 m	6,91 m
20 m	4 m	7,91 m
30 m	4 m	10,64 m
40 m	4 m	12 m

Équipement available:

Roof: PVC-covers white translucent, white opaque, coloured

Wall: PVC-covers, frame cladding, laminated and glazed fabric covering, Georgian windows, doors

Flooring : multi-layer flooring, cassette flooring
