

Revolution - Modular industrial structures

The king of modular construction

Revolution is an innovated, patented and unique design with a contemporary feel that offers brilliant yet simple engineering. This building will act as a vehicle to enhance any corporate image whilst offering you unprecedented practicality.

Revolution offers a constant internal clear span height ideal for any application. The economical benefits compared to traditional buildings are paramount to its success.

Advantages over traditional buildings

The translucent membrane roofs offer 100% natural lighting, which helps to reduce running costs as well as to create a more comfortable and pleasing

environment. Its modularity means it can be increased or decreased in size over time. The design of the roofs makes them very unique and aesthetically pleasing. It can be set up within weeks and can even be fully re-locatable.

Range

Height: from 5 - 10m
Span: up to 60m
Modules of 5m
Tri-dimensional roof
Wind and snow loaded .

Options

Fire doors, roller shutter doors, glass panels and windows, glass doors, loading bays, insulated and non-insulated options, gutters and down pipes...

Applications

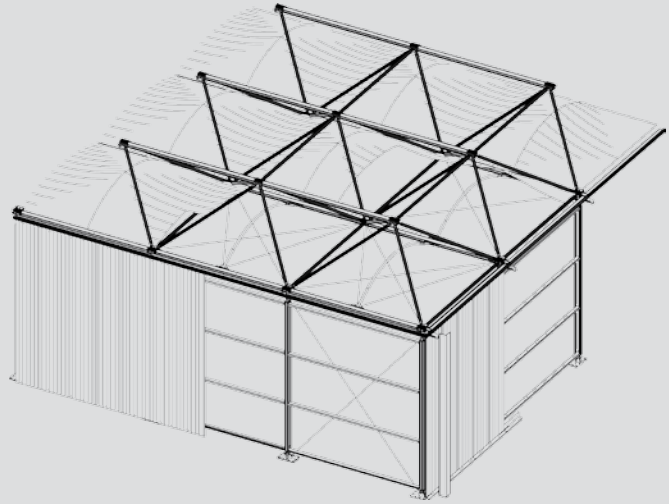

Storage, logistics, grand stand covers, exhibition centers, show rooms, garages, stores, offices ...

Walter SAS
and the
respect for the
environment

Because today the respect for the environment concerns all of us, Walter SAS is involved in a sustainable development. So, when the use of the structure is over, the dismantled structure can either be reused, or completely recycled («Texyloop» for the fabric).
